

The Way I Do Business:

Goals: When working with clients, I follow a procedure which has proven effective in helping people develop a sound financial management program. After a comprehensive understanding of your needs and goals, a proper strategy is developed. This is essentially a game plan that enables you to get from point A (where you are now) to point B (Where you want to be).

Education: I'll describe the reasoning behind the recommendations and how they fit within the scope of your overall financial and tax plans. Also, any risks or potential problems will be covered so that you know exactly what to expect from your financial goals.

My Commitment to Quality and Principals of Professionalism:

My client's interest comes first. I am in business to help my clients achieve their financial goals. Expect quick and efficient responses to your inquiries. I return telephone calls and handle inquiries and requests promptly. I make it a point to know and anticipate my clients' changing needs.
